

I live in a town in Wyoming with one radio channel. Satellite radio provides variety and quality that is not otherwise available. Towns here are few and far between and weather is very tempermental. Weather updates are very important as I travel 100-150 miles each way to get to the nearest small city. Traffic updates are very important, as well. I listen to XM several hours a day. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. Please reject the NAB's petition 04-160 and support XM's ability to provide the kind of programming that XM listeners demand and deserve.
